

The image features a series of high-voltage power line towers, also known as pylons, silhouetted against a soft, hazy sky at dusk or dawn. The towers are arranged in a receding line from the left foreground towards the right background, creating a sense of depth. The sky is a mix of light blue and pale orange, with some wispy clouds. The overall mood is industrial yet serene.

# About us

**Sichuan XiangYue Power Line Components Co., Ltd** is an experienced manufacturer in transmission tower and telecommunication tower.

- The registered capital is **50 million Yuan**
- Located at **Chengdu**, South-westerner China
- more than **150 employees**, including **40 Senior engineers**.
- annual sales turnover **20 millions USD**
- production capacity **30,000 Tons** yearly
- Management has **average 20 years** experience
- Strong supply chain which meet various requirement of clients

# 01 Product & Facility

# Production Facility

- 7 production lines of Angle steel automatic line 、 3 flat steel automatic line
- **More than 100 sets** of other production equipment
- Intelligent manufacturing is widely applied in every process of producing.
- Advanced equipment and digital workshop ensure product quality

Angle steel automatic production line

four column hydraulic press

# Production Facility

hydraulic plate shears

CNC steel plate production line

# Product

- XiangYue Power Co., Ltd. is **one of the largest professional manufacturers** of transmission tower in south-western China.
- The company provides various **galvanized steel structures**, specialized in 500kV and below the line of **transmission tower、 telecommunication tower 、 substation structure 、 electrified railway steel structure**

- **Transmission line tower**

132Kv transmission tower

330Kv strain tower

500Kv double-circuit tower

# Product

- Telecom tower

6m rooftop tower

Lattice guy tower

monopole

30m 3-legs tower

radio tower

Package and shipment

# Package and shipment

- Package Tower is consist of thousands pieces, so package is professional and significant stage . There **is a professional team of** the company to mänge this process.

- Package rules

Every piece of our product is coded. For example: 1BJ1A represents tower type, H3 represents the third segment, 202 means the 202<sup>nd</sup> piece of the third segment.

All the piece are **properly coded and packaged** through the drawing which could guarantee **no single piece missing** and easily **to be installed**.

- shipment

Normally we guarantee the product will ready **in 20 working days** after deposit. Then about **5-7 working days** will be taken to ship the cargo to Shanghai Port. It is still depends the specific requirement of clients.
